

DISCLAIMER- MISSION LITTLE HEARTBEATS

Mission Little Heartbeats functions on a case-specific medical support model. To ensure complete transparency, accountability, and ethical utilisation of donor contributions, the following terms apply:

1. Case Procurement

1.1 All paediatric cardiac cases supported under Mission Little Heartbeats are solely procured by the Social Wing of Fortis Hospital, Manesar.

1.2 The organisation does not source, select, or screen cases independently.

1.3 Cases reach the hospital through free medical camps, free OPDs in rural or underserved areas, or through families approaching the hospital directly.

1.4 Only after the hospital's internal assessment and recommendation does Mission Little Heartbeats extend financial support.

2. Medical Assessment and Success Probability

2.1 All medical evaluations, diagnoses, and treatment plans are conducted by qualified doctors at Fortis Hospital, Manesar.

2.2 As communicated by the treating doctors, paediatric cardiac surgeries under this initiative carry an estimated (>90-95%) success probability, based on clinical history and current medical standards.

2.3 Mission Little Heartbeats does not provide medical guarantees and relies entirely on the hospital's expert assessment.

3. Verification of Beneficiaries

3.1 Verification of the child's medical condition, family background, and financial need is undertaken exclusively by Fortis Hospital's Social Wing.

3.2 Mission Little Heartbeats does not conduct separate or parallel verification; it relies on the hospital's due diligence and documentation.

3.3 Only cases deemed genuine and financially deserving by the hospital team are forwarded to the organisation for support.

4. Utilisation of Donor Contributions

4.1 Donors may choose to contribute toward a specific child; however, the final utilisation of funds depends on actual medical costs, hospital requirements, and real-time case assessments.

4.2 In situations where a donor covers the entire cost or where the funds raised for a child exceed the final amount required, any surplus is carried forward to support the next eligible child under Mission Little Heartbeats.

4.3 No donation remains unutilised or diverted for non-medical purposes. All funds are strictly applied toward paediatric cardiac interventions for current or subsequent cases.

5. Financial Transparency and Ethical Practices

5.1 Mission Little Heartbeats maintains stringent financial oversight to ensure proper allocation and accountability.

5.2 The organisation does not engage in double-funding, duplicate billing, or any practice that compromises donor trust or transparency.
